## ABOUT ME

Hi, I'm Dev Singhal, a passionate coder with a knack for solving real-world problems through code. I specialize in mobile app development and have a strong programming background. I also bring leadership experience to the table, making me a versatile asset

## EXPERIENCE

### Chief Technical Officer

ThriveUp

March 2023 - Present

- Overseeing and managing development team.
- Developing and executing company's tech strategy.
- Engaging with clients and meeting their demands.

### Core Team Member

Data Science Club, Amity University

May 2022 - Present

- Content writing for the club.
- Handling promotions, coming up with new ideas for the events.

## MY PROJECTS

### Relief App - Google Solution Challenge 2023

Successfully lead my team and created Relief app, focusing on connecting volunteers, people in need and NGOs. Effectively achieving three goals of United Nations' 17 Sustainable Development Goals using Google Technologies.

### Smart Home Device for physically challenged

Made a cost effective and highly customizable device for my non teaching credit course project which allows people, with certain disabilities, control their home and devices. This device can be tuned to every person's specific needs.

- Also, created 10+ apps while working for ThriveUp, and have some ongoing projects.
